

Final Project Report - N100 Financial Intelligence

Executive Summary:

The N100 Financial Intelligence project successfully automates the financial analysis of 92 top Indian companies.

Key Achievements:

- Automated 92 Company Tearsheets and 11 Sector PDFs.
- Machine Learning: Applied KMeans clustering to segment companies into 5 archetypes.
- NLP: Auto-generated Pros & Cons using 24 heuristic rules.
- API: Developed a high-performance 16-endpoint FastAPI backend.
- QA: Built a full Pytest suite with 74 tests passing (100% success).

Conclusion: All 20 project acceptance gates have been verified and signed off.
